COVER-MS Update: New dashboard, 4th dose reporting and more!

We hope that you are navigating all of the changes that COVID-19 keeps sending our way. It's clear by now that vaccines are helping reduce its impact. However, there is still much to learn about COVID-19 and vaccines in people with MS. So, we're planning some new activities for the COVER-MS study. **What questions do you have that COVER-MS could help to answer?** [Send us an email](#) and let us know.

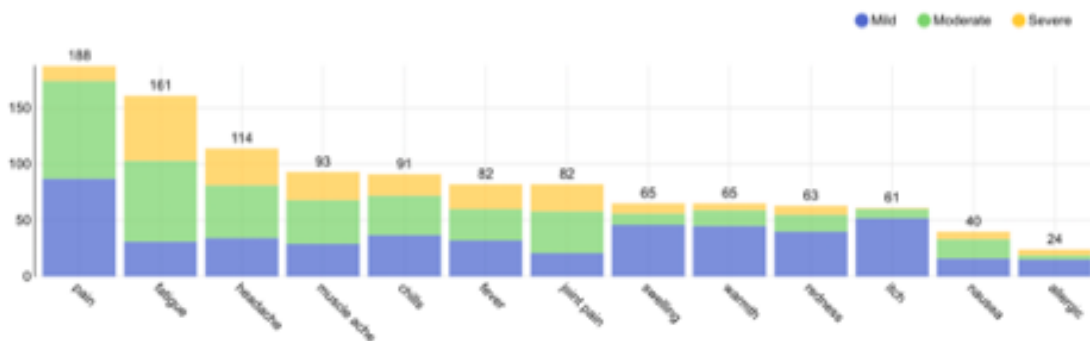

New Data dashboard: Our technical team has created a [real-time data display](#) for the COVER-MS study, showing key characteristics of our participants and their vaccination experiences. Please take a look and [let us know](#) what you think!

COVER-MS Data Dashboard

Participants **Vaccination Reactions** Vaccine Type Therapies MS Type COVID-19 Test Age Sex Race Ethnicity Location

Vaccination Reactions 1 Vaccination Reactions 2 Vaccination Reactions 3

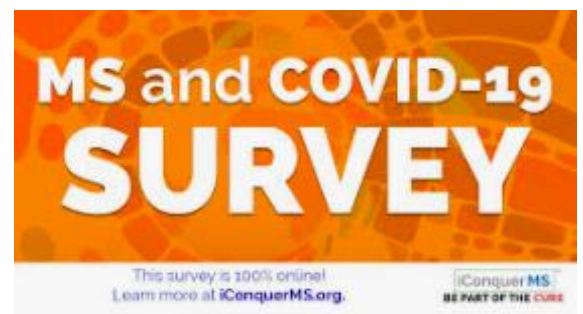

COVID-19 Vaccination Reactions (Dose 1)

Have you received any vaccine doses that you haven't reported yet? If so, please [log in](#) to your iConquerMS account and share the details. We're hoping to have all of our participants' vaccinations reflected in the dashboard and the database.

Received a 4th dose? Some countries are advising people who are immunocompromised to receive 4 vaccine doses. If you've received a 4th dose, you can now provide the details in COVER-MS by completing "Vaccination Details Survey – 4." We'll begin displaying the details for dose #4 on the dashboard once we have more data.

Please let friends and family members who are interested in MS research know about COVER-MS. The study is open to anyone who has received a COVID-19 vaccine or plans to receive one. Our website has more information about COVER-MS and we always welcome questions and feedback at info@iConquerMS.org.

Thanks for your help conquering COVID-19!
