

## iConquerMS Spotlight – REAL MS

In the summer of 2016, iConquerMS launched [REAL MS™](#) (Research Engagement About Life with MS), a longitudinal study of MS during which participants periodically provide information about their experience with MS through surveys. In March 2018, a fourth round of REAL MS surveys were released through the iConquer MS portal. The information collected through these surveys will play a pivotal role in helping scientists and clinicians gain a better understanding of the health and quality of life over time for people with MS. Based on the premise that “Your Health Data Has Power”, this study is just one of the many ways iConquerMS is facilitating and accelerating research on topics of importance to people affected by MS.
