

A Clinician's Guide to People-Powered MS Research

Connect Your MS Patients With a Powerful Research Community

Give your patients a voice in the research shaping their care.

Accelerated Cure Project for MS (ACP) is a patient-founded non-profit dedicated to accelerating a cure for multiple sclerosis by putting lived experience at the center of research.

Our primary initiative, **iConquerMS**, is a secure online research network where your patients can partner directly with scientists by contributing their health data and lived experiences—transforming research from something done for people with MS to something done with them.

Why Recommend iConquerMS?

By connecting your patients to iConquerMS, you provide a resource that:

- **Empower People Living with MS:** Offers a tangible way for individuals to contribute to science and gain a sense of agency over their condition.
- **Fosters Community:** Connects individuals to a supportive network of peers and advocates, potentially reducing feelings of isolation.
- **Improves Research Outcomes:** Helps ensure that clinical studies measure outcomes that are truly meaningful to people affected by MS.
- **Accelerates Discovery:** Creates a rich, integrated dataset that enables researchers to test hypotheses and validate findings faster.
- **Provides a Trusted Resource:** Equips you with a credible option for patients who express interest in research participation.

How Your Patients Can Participate

Participation is free, secure, and flexible. Your patients can choose their level of involvement, including:

-  Completing surveys on health and quality of life.
-  Participating in pivotal MS research studies on symptoms management, intervention effectiveness, and more.
-  Joining focus groups or advisory councils to provide input on specific research projects.
-  Contributing to the collection of new biosamples.
-  Staying informed about the latest in people-centered research.

iConquerMS welcomes all ages, races, and ethnicities, and offers specialized groups for adults, youth, and care partners.

Help Your Patients Get Involved

Encourage your patients to visit [iConquerMS.org](https://www.iConquerMS.org), where they can share their experiences, participate in studies, and accelerate MS discoveries.
