

iConquerMS: Your Partner in People-Centered Research

Where Lived Experience Drives Breakthrough Research

iConquerMS is the people-powered research network from Accelerated Cure Project for MS (ACP), enabling direct partnership between researchers and an engaged community of more than 10,000 people affected by MS. Skip recruitment barriers, access real-world insights, and design studies that reflect lived experience—all through one integrated platform that combines biosamples, data, and direct community engagement.

How iConquerMS Supports Your Research

iConquerMS provides a flexible platform to support research from start to finish. We can help you:

ACCESS OUR ROBUST MEMBER DATABASE	LAUNCH CUSTOM SURVEYS	FACILITATE FOCUS GROUPS & ADVISORY COUNCILS	RECRUIT FOR YOUR STUDIES
Leverage our constantly growing database of patient-report outcomes, including demographics, MS history, Neuro-QOL, PROMIS Global Health, and data on diet, wellness, physical activity, and comorbidities.	Efficiently conduct new cross-sectional or longitudinal surveys to understand the community's needs, interests, and experiences. We can target the entire community, or a subsection based on your criteria.	Recruit and facilitate focus groups and patient advisory councils to gather deep qualitative insights on a wide variety of topics, from one-time conversations to long-term engagements.	Find and engage participants without typical recruitment delays. Reach the diverse iConquerMS community broadly, or target recruitment to specific populations based on your study's inclusion and exclusion criteria.
COLLECT PROSPECTIVE BIOSAMPLES	DISSEMINATE YOUR RESEARCH FINDINGS	ADVANCE YOUR INCLUSIVE RESEARCH GOALS	REFINE YOUR RESEARCH FOCUS
Collect new biosamples such as saliva, cheek cells, skin swabs, urine, or fecal samples, or coordinate in-home blood collection via mobile phlebotomy.	Disseminate your research to the MS community in accessible formats like lay summaries and infographics—building trust, closing the loop with participants, and demonstrating impact to funders.	Partner with our Research, Inclusion, Diversity, and Equity (RIDE) Council and MS Minority Research Engagement Partnership Network (MREP) to enhance diversity and inclusivity in your research, from study design to recruitment and dissemination.	Gain community input as you develop research questions and design studies—ensuring your work addresses real-world needs and has meaningful impact.

Let's Build Your Next Study Together

Contact our partnerships team to discuss how iConquerMS can accelerate your research goals.
